# ***Save your family and your home from the damaging effects of over-dry air.***

***Dry nose and cracked, itchy skin. Aggravated allergy and asthma symptoms.***

***Painful static shocks. Chipping paint and plaster.***

***Warped or damaged wood floors and furniture, trim and molding.***

Sound familiar? Why go through another season with these problems when there is a solution—an Aprilaire Whole-Home Humidifier.

Turning your temperature up in the wintertime will keep you warm but won't increase your home's humidity. Daily activities like showering, cooking, and doing laundry won't produce enough moisture to keep your home's air from being too dry. According to medical experts, many viruses thrive in low humidity and can increase the likelihood of getting colds, flu and upper respiratory ailments. The American Society of Otolaryngology reports that it is important to prevent an overly dry environment because it makes people more susceptible to infection.

A whole-home humidifier from Aprilaire, installed by your heating and cooling professional, will deliver the perfect amount of moisture to your air making you feel more comfortable at lower thermostat settings. In fact, the EPA states that you can save up to 4% on your heating bill for every degree you lower your thermostat! Increase your family's level of comfort and protect your valuable furnishings by adding just the right amount of moisture with an Aprilaire Whole-House Humidifier.
